INTRODUCTION TO ETERNITY

Welcome to ETERNITY, we hope you enjoy this first issue of the magazine. As this is the first issue you can appreciate we have had a few 'teething' problems - Expect much better to come!

You will see you are already saving booking fees with several organisers and we are arranging a lot more. We hope to be ticket agents with ALL rave organisers within the next few months - You are also eligible for discounts at many shops and again we are arranging a lot more - keep an eye on your magazine for details. The success of Eternity depends on you our members - Help us to help you, spread the word.

ETERNITY KEEP YOU INFORMED!

TIPS FOR E HEADS USE AND ABUSE

When you've had your 'E' and you think it's not working do not go and have another or anything else. Not all E's take the same length of time to work. It also depends on how strong it is, what you've eaten before, your frame of mind, how often you actually go out and take ecstacy and much more, so don't just assume you've bought a dud.

The best thing to do is stop worrying about whether its working or not, let yourself go and get into the music, you will suddenly find that you are experiencing what you had paid for.

If you make the error of having more because you think what you have bought is not working, you could end up with it all hitting you at once, that could end up with you being 'cabbaged' or on the floor. (Or even worse)...

If you really do think that you've bought a dud you may be better going home if you can't enjoy yourself without anything, mixing Ketamine that you may have mistaken for Ecstasy could have serious consequences.

Don't bother drinking alcohol because your wasting your money - drink and drugs don't mix - if your drunk your E won't work or you could end up in hospital (especially if you're a novice to taking the drug). But remember to drink lots of non-alcoholic drinks and take brakes to cool down!

If you're finding you need more to get the same buzz its time you were slowing down. Why not go every other week instead of every week or even save yourself for a really good All Nighter every 2 or 3 weeks. Drugs are just the same as drink, if you keep taking it you're body will become immune, this is why you need to have more for the same buzz.
The main thing to remember is that however long you've been doing it and however many E's you've had, you still do not know everything about it , don't get clever. We are not telling you not to do it, because we know you will, but BE CAREFUL!

ECSTASY (MDMA) Vs KETAMINE (Special K)

Over the last 5 years Ecsatsy has really taken off and over 500,000 E's are taken every week, it could be as many as a million. Is the drug really harming you though? Well the answer is no one really knows. Of course there are several deaths every year that make you sit up and think, but your probably sitting there thinking it won't happen to me, the chances are it never will happen to you BUT it could. Follow tips for E heads and hopefully you will not become one of the unfortunate few. We can, however, tell you that Ketamine, otherwise known as 'Special K', 'Kit Kat', is harmfull to you and certainly is not an alternative to Ecstacy. The drug is an anaesthetic and can be compared to the animal tranquilliser, PCP.
The effects can be horrific - rather like a bad acid trip - people thinking they can fly. Some people have total paranoia, panic attacks causing heart attacks and others just cabbaged for hours. Whatever, it will certainly screw your head up. Ketamine is not an illegal drug and dealers are selling it as 'E' so be carefull where and who you get your gear from. At one club where Ketamine was sold as Ecstasy people all round the club couldn't walk, were grabbing hold of the walls, passing out and not dancing and enjoying the night as most ravers would expect.
This is certainly a drug to beware of as it takes longer to effect you. You could buy it thinking it's an 'E' , after an hour or so think "this is shit, its not working, its a dud" go and buy something else - this could be fatal - this is why we suggested to you our 'Tips for E heads'. Remember if it doesn't seem to work don't have more, try and enjoy yourself or go home - better safe than sorry.

LOVE HEARTS DO RAVERS LOVE THEM

NO, it seems that these are not the replacement for Ecstasy as they are supposed to be. All they do is make you feel extremely hot, when we tested them it seemed like your arse was on fire - you felt like you were burning up and as if you had pins and needles in your arms and legs. No feeling of happiness, no rushing and very easy to start panicing thinking its not going to end. The packet they come in explains that there is no problem about the amount that you can take. They are actually legal at present so you can be lead into thinking 'oh well, no problem' .

We spoke to one person who had thought just that, he took three at once. He thought he was burning up - he was burning up - he went bright red and ended up going home and lying in a bath for 3 hours to try to reduce his body temperature. We suggest that you keep away from them. We hope that they are soon taken off the market before someone is seriously injured.

Rave Report-Feedback

THE BIGGEST & BEST ALL NIGHTERS

Are they the biggest and the best?
You will see plenty of flyers for large All-Nighters, names like Amnesia House, Galactica, Raindance, Myhtology, Starlight. Are they offering more than the other, bigger and better than the other, do they deliver what they offer? We have reason to believe that several Raves around the UK don't even have half of what they offer at the venue. You are paying £25 to enter some of these Raves and more, and by no means getting your money's worth.

We will be trying to stop all of that and keep you informed of our progress. Of course you can't expect absolutely everything to be there because even if its been confirmed the organisers can be let down, but not to be let down by half the attractions. Those are the cases where you are being let down by the Rave organisers.

We will be sending representatives from Eternity to some of these Raves chosen at random to report back and inform you through this magazine. We can't of course attend all of the Raves around the country so would ask you to write in and let us know how you have found Raves you have been to. Were all the attractions there? Was there any trouble there? Did all the DJ's turn up? Were all the tickets sold out? And most importantly did you enjoy it and would you go to another one organised by the same promoter? Please write in and you could win our magazine £10 prize for the best letter.

RAVE ORGANISERS BEWARE!

WE'RE WATCHING YOU!

We will also be carrying out surveys of other night clubs throughout the UK weather they are All-Nighters or not. We promise to keep you in touch and yet again any comments from you can only help.

We have sent our representatives to a few clubs and large 'All Nighters' over the past few months and will be going to a lot more over the coming months. Here are the reports from our representatives:

The WAREHOUSE Doncaster

Another excellent club which this time boasts being open all night from 9.00pm to 6, 7, 8am depending on the line up and attendance. Excellent sound and lighting system but unfortunately no lazers. The centre platform for dancing is overlooked by the balcony from the 2nd floor which is still being updated but seems to be better every week. The club usually has space to dance unless a top DJ is on such as Carl Cox when space is limited. Plenty of air can circulate around the club so it doesn't seem to get too hot. You can actually go outside if you wish where there are deck chairs under a canopy or you can sit on a double decker bus which is parked in the yard, and seems to be a favourite. There is an excellent cafe bar where you can get food, hot and cold drinks including slush puppies, agreeably no alcohol.

The line up is excellent every week and the resident DJ 007 and MC RUSH are brilliant. MC NATZ also appears regularly and if you haven't seen him you should, he's certainly the best we've seen. The price for entry is £10.00 unless there is a live PA when it goes up to £12.50. Excellent value for money as it is an 'All Nighter'. Again friendly but firm security and a full body search is carried out on entry, definately no dealers, if you deal - don't bother. This is a top club and we once again one we highly recommend.

AFTER DARK (The Orbit), Morley, Leeds.

A excellent club which is open every Saturday night from 7.30pm - 2.00am. The club has a top quality lighting system which includes multi-coloured lazers. It is full every week of happy friendly 'Ravers' and has one of the best atmospheres of any Rave we have visited. The negative points are few but we did notice that the club gets very packed leaving little space for you to dance, it gets very hot - in fact too hot.

There is, however, a chill out room and plenty of drinks available and ice lollies. The club is on 2 floors, the 2nd floor having a balcony that looks down onto everyone enjoying themselves. The club also has a good line up of DJ's every month and the resident DJ HUGGI and MC MOTORMOUTH are both excellent. Another negative point, in our view, is that the club finishes at 2.00am.

The staff are friendly but firm and there is a full search on entry. We spoke to lots of people in the club that had driven a long way on the recomendation and they all said that they would come back again. Price for entry is £8.00. Not to be missed. Try it one weekend.

NEXT MONTH!!! HELTER SKELTER (FANTAZIA) ▪ EVOLUTION ▪ QUEST AND MAYBE YOUR CLUB - SO BEWARE !!

Rave Report-Feedback Continued

GALACTICA

Ripon Racecourse Oct 19th

We didn't go to the venue at York Racecourse, which was the last Galactica, but but we have received lots of reports from people that did. Some of the ravers we spoke to have been going to such events for several years and plenty of them! They still thought this was one of the best they had ever been to . We decided to see what the fuss was about and this is our report on there next event at Ripon Racecourse....

WHAT A NIGHT! An absoluteley excellent atmosphere and it seemed that everyone there enjoyed themselves. We saw no trouble at all and understand that only a few arrests were made for possession charges. Joey Beltram was brilliant, completely 'off yer head music'. There were complaints from a few people about the music around 2 - 4am and to be honest we weren't in the tent at that time as we weren't too impressed either, we had decided to check out the fair rides. All in all though the music through the night was good, D.J. Colin Faver was cancelled at the last minute so he wasn't there but all the other D.J.'s promissed were there. If you were in any state to notice MC Natz also appeared near to the end, so that was a surprise treat for his fans.

The venue actually had a capacity of 8000 people but only approx 5000 tickets were sold, perhaps a sign of the recession, it did however mean there was more room to dance and you were not queuing for hours for rides and refreshments. The flyer advertised there would be circus performers and a bar fly, we didn't see either of these on the night, as we've said before it is sometimes beyond the control of the organisers and lets face it the night was just as good without them.

The gyroscope was there and can be recommended but not for the faint hearted. Also as promised the 3 large tents were joined by tunnels and were very impressive. There was a garage tent, a refreshments tent and the main tent which had an amazing laser show, well set stage, live video link on screen and the other scans, strobes and zaps as promised.The fairground was OK although its a shame there was no loud music or lasers on the rides, especially the waltzer which didn't seem the same without, we imagine this was due to the worry about local complaints against noise, we did also notice that the music was turned down in the early hours although if you were in the tent at the front you probably didn't notice.

One thing we have noticed at a lot of Raves over the last year there is a growing number of young people, as young as 15 years, there seemed very few there around at this age, perhaps £25.00 was too much money for them, for what ever reason we had a Fucking Great Time and will certainly be going to the next GALACTICA making sure they keep up there high standards. SEE YOU THERE!

Events Cancelled

HEAVEN PHASE II

16th October

This event was an illegal event and there is always a chance things will go wrong. The plan was to meet at Sheffields Meadowhall Centre and then move on to the venue. When the organiser arrived at the event he was approached by what seemed like two ravers. When they found out who he was they produced ID and advised him they were undercover police and arrested him on suspected drug charges. He was taken to the police station and held for 5 hours, by which time it was too late for the event to take place. The organiser as asked us to pass on his appologies and has told us that everyone expect one person has been given a full refund. The Chinese lady that bought a ticket outside Sheffield City Hall can not be found, contact us now for your refund.

WARNING

X-Static Promotions

6th November OXFORD

Yet another event cancelled, this time no one was informed and a lot of money is still outstanding to promoters. We have tried to contact X-Static since the 6th and had no success, the phones it seemed have been taken off the hook.We have had several complaints that refunds have not been given. We understand from one source that this event was campaigned by the organisers knowing that a licence was not granted and had very little chance of being granted. Tickets should not be sold and flyers should not be given if it looks like the event is not going to take place. What a load of Bastards.

CRYPTONITE

Such a Feeling

THE PETERBOURGH AREANA - FRIDAY 23rd OCTOBER

This event was cancelled at the last minute by an injunction by the police. We have been informed that you can receive your refund by contacting your ticket agent. **If you have any problems let us know!** Another source has informed us that their licence was granted on certain terms, terms that could not be met.

ALL NIGHT 10PM - 6AM

FANTAZIA

the...

CLUB Tour

PART VI

Are proud to present the **Club Series Part VI** at **The Old Cinema Tan Bank Road,** Wellington Town Centre, Wellington, Telford. This building an Edwardian cinema will be transformed by a team of designers creating a **futuristic environment** to complement the electric atmosphere generated at our massive all-nighters. This venue promises to become the country's **leading all-night dance club** offering a multitude of attractions and undoubtedly great value for money.
This is a series of **3 dates** with a selection of leading national and regional **DJ's and MC's** providing an excellent source of entertainment up until Christmas for all those people who have enjoyed our summer events - **Summertime in Bournemouth** and **One Step Beyond at Castle Donington** followed by the **Showcase** at the Bath and West Showground.

World News
Over the last few months!

WE WILL KEEP YOU UPDATED ON ANY ITEMS THAT HAVE HIT THE NEWS OVER THE PAST FEW MONTHS. ANYTHING TO DO WITH DRUGS, CLUBS, RAVES AND RAIDS. IF IT EFFECTS YOU WE WILL INFORM YOU!

WORLD WIDE

Raving is now hitting the world with tremendous impact and is growing eveywhere. One place you'd be suprised to hear is Russia. They have now had several Raves and guest DJ's have even appeared from London. Money is scarce and it's probably going to take a while before the designer drug takes over. We hope to help promote Raves in Russia in the New Year spreading the happiness accross the globe.

ECSTASY HAUL

Following a three week operation, knowm as operation Nucleus, undercover police seized the largest haul of Ecstasy ever, 150,00 tablets. A 39 year old Spanish nightclub owner and a 45 year old man from Kent were arrested. The haul weighed over 80 Kilo's and was estimated at a street value of around four and a half Million pounds.. Police are still trying to find other members of the gang.

DOCTORS WARNING

Although no one is really sure of the immediate or long term effect of Ecstasy, in the news recently doctors have warned that it can harm the heart, the liver, cause serious depression and brain damage. Then again so can alcohol. You've still been warned.

DEATH

Paula Carrier, 20 years of age, has become another unfortunate victim it seems to the drug Ecstasy. She was in intensive care at Manchester Royal Infirmary and suffered two heart attacks. Its not sure if Paula had intentionally taken the tablet or if she had her drink spiked. The whole family are devostated along with friends and neighbours. If this was a case of a drink being spiked please learn how serious it can be - remember if you choose to take the chance of injury or death by taking drugs that's your choice, don't take that choice away from someone else.

NOISE COMPLAINTS

Police were so worried about the noise at an all night rave they set up a complaints hot line so people could phone in. There were three complaints, two of the complaints were about the Police Helicopter that kept flying over! Will they ever learn?

DONT MAKE MATTERS WORSE!

The bad name of raving is made worse by peoples stupid actions. There is rarely any trouble at raves and a lot of the bad name is out of order. All right, drugs are taken but that's the choice of the people taking them, its hopefully not harming anyone else. A fire at an illegal rave in Norfolk at Crouch Farm, Stoke Ferry was made worse in September by the persons waiting to go in throwing missiles at fire fighters when they arrived. No one was hurt but there could have been a catastrophe. There were no arrests but the organisers are being hunted. If you give people no reason to complain they will still find something to complain about but it seems pointless helping them.

POLICE FIND CANNABIS AT THEIR POLICE STATION

Three Cannabis plants, one almost 3ft high, were spotted outside the window of a police station canteen by two policemen eating their lunch. The canteen is on the second floor so PC's Steve Woolway and Lynn Bishop are certainly not DOPES. The plants were destroyed and the land was sprayed with weed killer. The size of the plants indicated that they had been there for quite some time, perhaps being cultivated by someone who thought they might not be spotted in such an obvious place?

INJURED

Twenty youngsters were hurt at an All-Night Rave in Lydd, Kent when a roller coaster collapsed.

"WE ARE NOT GOING TO PREACH AND TELL YOU NOT TO TAKE DRUGS BECAUSE WE KNOW YOU STILL WILL. WE WILL, HOWEVER, KEEP YOU UPDATED ON CURRENT AFFAIRS RELATING TO THEM SO YOU KNOW THE RISKS INVOLVED. YOU CAN THEN MAKE UP YOUR OWN MIND"

Drug Information

WHAT IS THE AIM OF OUR DRUG INFO PAGE?

Each magazine we issue will give you information on drugs related to the rave scene, what they do to you, tips on use, making them safer for you and where to go if you have problems. If you have not yet tried drugs - DON"T. There are plenty of people that go to raves and have never taken any kind of illegal drugs, people that get a buzz off everyone else there, so don't think your the only one who's there that's not on something because you're definitely not. Some of our stories, tips and advice may sound to you like we condone the use of drugs - we don't - if we spent each magazine telling you not to because its bad no one would bother reading it. We will point out the dangers as they are recognised by official bodies and you can make up your own mind.

WHY DO PEOPLE DIE FROM DRUGS?

Most deaths related to drugs are caused by stupidity. Some unfortunate people try the drug for the first time and have an allergic reaction to it which causes serious mental injury or death. Most of the deaths from the use of Ecstasy come following heart attacks or heat stroke. Ecstasy is a dancing drug and people think they can dance all night without stopping - you can't. You should stop for drinks and to cool down.

Most of the deaths relating to Acid (LSD) are people thinking they can do something they obviously can't. People tripping may think they can fly and jump from a high building, this is particularly a dangerous drug if you are on your own and inexperienced or with other stupid people (of course some people would say that you are stupid to take drugs anyway).

We will give you more information on each drug individually in more detail in further issues. We can tell you to put your mind at rest that 10,000 people die a year as a result of alcohol, 100,000 die a year as a result of smoking and less than 300 die a year from all the illegal drugs put together.

YOUR QUESTIONS ANSWERED!

Q Why does the same dose of the same drug cause different effects?

A There are many things that influence the effects of a drug. The way the drug has been taken, your frame of mind and the place that the drug was taken.

HOW THE DRUG WAS TAKEN

Most drugs can be swallowed, sniffed, smoked or injected. (The amount you take is also important).

YOUR FRAME OF MIND

Have you had some bad news an argument or just upset. If so your drug will probably make you worse NOT happy. (Happy people become even more happy)!

THE PLACE

In a club some drugs are fine but others can be a real problem. Taking some in a quite place, just a couple of you could result in no effect at all. This is usually the major cause of drug problems.

HOW IT IS TAKEN

Someone who has injected a drug will find it much stronger than someone who has simply swallowed it. Sniffing and smoking are also stronger and work quicker than swallowing because it is getting around your blood system quicker. The more you take the stronger it is. However very few people actually inject drugs due to all the serious problems connected with it. Injecting drugs can cause an overdose, contracting HIV, causing AIDS, and other serious infections such as Hepatitis from sharing needles and syringes. Abscesses are caused by using crushed tablets, gangarene is caused by hitting an artery instead of a vein and blood poisoning is more likely when injecting because high doses are common, the rush is more sudden and injection is felt as a ritual causing addiction.

YOUR FRAME OF MIND

If you have had some bad news or are in a bad mood the chances are that by using a drug you will not suddenly become happy but actually become worse. Using Ecstasy you can actually feel no effect at all if you are in the wrong frame of mind or worrying about something. Using Acid (LSD) could cause a bad trip.

THE PLACE

This can be a very important factor and is often the main cause of of drug problems. If someone was having a LSD tab for the first time and went to a rave club where there are hundreds of people dancing, laughing and coming up to you, lights flashing everywhere and loud music you could easily become paranoid, confused and start having a bad trip. If you and a mate have just had one with no one else around and one of you was an experienced user there would probably be no problem, any signs of a bad trip could be helped by the other person. Ecstasy, however, used in this situation would probably have little effect. Each different drug should be used at the correct time and place to avoid these additional problems.

Readers Letters

READERS LETTER

The police feel they have made a significant success in finding 150,00 Ecstasy tabs. Don't they realise that they will not stop people taking 'E's and not stop people pushing 'E's. At the end of the day all that they have successfully done is prevent 150,00 tabs from getting into the market. People will still be trying to buy what they hope is ecstasy but the chances are that pushers will now be pushing an extra 150,00 Ketamine, Acid or dog worming tabs because of the lack of the real thing. That's no success! People will now think they are buying E's and end up with something else instead.

All right we're not saying that Ecstasy isn't bad for you and won't harm you but there is a hell of a greater chance that Ketamine or Acid will harm you (especially when you don't know you're having it). What they have successfully done is help 150,00 people closer to the chance of hospitalisation or worse. It's bad enough the amount of shit that is cut with Wizz, E's etc., the last thing you need is the police enticing more of it.

The other problem of course is price. If there's less of it around there's a chance that the dealers will push up the price, they now range anything from £10 - £30 for each E depending on where and from whom you buy. The price yet again will not stop people from buying them - people without the money are likely to turn to crime to get the money - not a good move but it does happen.

It's now time to legalise drugs like Ecstasy but keep them under strict control, people will then know what they are taking. In some European contries you can actually buy Ecstasy over the counter of a bar, from a menu etc. but here in the UK it is a class A drug, WHY? Basically because the Government gets no tax from it like alcohol and tabacco which incidentally kills thousands of people more every year.

(S. Heald, Birmingham)

£10 PRIZE MY FIRST TRIP £10 PRIZE

I have been doing E's for over a year now but only when we go to clubs or All Nighters. I'd had a similar experience when I'd been out on E's and Wizz and gone back to a friends house to smoke some blow. This was a different, weird experience and hard to explain. We decided to stay at a friends house on our own to do it, he'd had a few before so sort of new what to expect, when the trip started I was glad of that because he helped me through some of the panicy bits. At first we thought it wasn't working, about 45 mins went by and we decided to go for a walk. It was great. We were just walking along and things started to get more defined colours & lights really jumped out at you. We kept having fits of laughter at what seemed nothing.

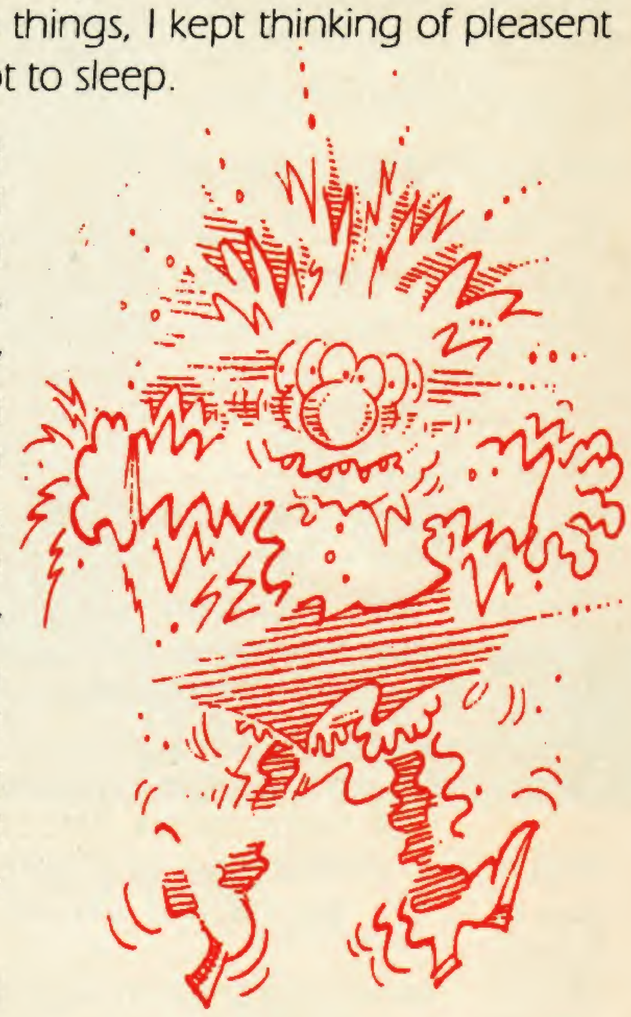
Then my friend started to grow and shrink in height and I seemed really short up against cars that were parked by the roadside - what the hell was going on? We decided to go back to the house as we were starting to get a bit paranoid thinking that everyone was watching us as we laughed our way down the road, luckily it was dark as it was about 10 o'clock at night. As we walked along the path back to my friends house it seemed to go on and on, suddenly we seemed to be standing still at one point but still walking and everything else moving by us. It seemed to take forever to get to the end of this road and as we looked back it seemed we'd walked for miles, we know from experience the road is fairly short.

We got back to the house and that was when things started to get really weird. As soon as your mind fixed on something, anything that either of you said seemed to happen. Plants swaying, moving and bending, the whole room seemed to change colour and then if you starred at each other you could make your friends head grow or his ears grow, I was hurting with laughter. We tried to watch some films but it was a waste of time, a good laugh. We got totally confused and as we tried to to explain it to each other we made it worse and convinced ourselves certain things were happening. At one stage we thought that the film was about a carpet that was being searched by the Police for a parking offence. A western we had been watching earlier was also coming back into the film along with earlier adverts and it all seemed one long film.

After about 5-6 hours we thought that we had really started to come down but if you concentrated you could still make things happen. Starring at the picture frame on the wall made all the colours change and chase each other all around the frame - an unbelievable experience. About an hour later we decided to get some sleep and as soon as I was on my own I started to see bad things, I kept thinking of pleasent things and eventually got to sleep.

I woke the next morning and had experienced some weird dreams as if I had been tripping the whole time. The next day I felt a bit spaced out, tried to act normal but still received a few comments about looking a bit lost. I felt a bit tired and very similar to how I feel after a night on Ecstasy. I wouldn't mind dancing on it now but will probably have a few more at home first.

(D. Parkinson, West Yorks)



Was your first experience the same, similar or totally different? Have you had other experiences using E's or Acid or any drug related to the Rave scene? Write and let us know, yuo could win the

£10 PRIZE
